Develop your competence in supporting people with special needs

Enhance your knowledge and skills when supporting people with special needs. The Professional Certificate in Special Needs Interventions comprises two workshops that will assist associate psychologists and qualified psychologists in adapting and understanding mental health behaviours and interventions.

Workshop I: Behavioural and Systemic Interventions in Special Needs (PLT8013)
Empower and enable special needs individuals to have a better quality of life. Better understand their needs and apply intervention techniques that address behaviour changes from both an applied behavioural perspective as well as a systemic perspective.

12 - 13 & 27 July 2022 | 9am - 5pm | Faculty of Arts and Social Sciences, NUS

Workshop II: Mental Health Management in Special Needs (PLT8014)
Be better at identifying and addressing mental health issues in people with special needs, that are often masked due to cognitive or linguistic limitations. Acquire psychological management skills that will enable you to screen your clients for mental health concerns, recognise their needs and strengths, apply suitable mental health interventions, and support their access to mental health care.

2 - 3 & 16 Aug 2022 | 9am - 5pm | Faculty of Arts and Social Sciences, NUS

ABOUT THE TRAINERS

Ms Lily Lau  
Locum Senior Principal Psychologist, KK Women's and Children's Hospital
Lily has been practicing as a psychologist at KK Women's and Children's Hospital for over 15 years, providing diagnostic assessment and intervention to children with neurodevelopmental disorders, and behavioural and/or emotional difficulties. She has also trained learning support educators in preschools to provide positive behavioural support to children with behavioural and/or emotional difficulties, and provided consultation to preschool teachers on promoting children's social-emotional competencies.

Ms Lim Jan Mei  
Principal Clinical Psychologist, Institute of Mental Health
Jan Mei is a Principal Clinical Psychologist at the Institute of Mental Health (IMH), and specialises in the area of adult neurodevelopmental disorders. She works with adults with intellectual disabilities and neurodevelopmental disorders with co-morbid mental health conditions by providing psychological therapy and conducting various standardised psychometric assessments. Jan Mei currently leads a team of psychologists within the Adult Neurodevelopmental Service (ANDS) in IMH, overseeing the provision, planning and service developments of its psychological service.
