

Grow your expertise in child assessments and interventions

Enhance your knowledge and skills in clinical child psychology practice. The **Professional Certificate in Child Assessments and Interventions** comprises two workshops that will equip associate psychologists and qualified psychologists with common child assessment skills and evidence-based interventions.

Workshop I : Child Assessments in Clinical Psychology (PLT8015)

Learn to collect and synthesize data when assessing children based on psychometric theories. Develop the ability to interpret common psychological assessment instruments and explain the findings in appropriate language under the supervision of a trained psychologist.

11 - 12 & 25 Oct 2022 | 9am - 5pm | Faculty of Arts and Social Sciences, NUS

Workshop II : Child Interventions in Clinical Psychology (PLT8016)

Acquire a thorough understanding of key psychological intervention theories and frameworks, and excel in setting appropriate intervention goals. With the supervision of a trained psychologist, learn to apply evidence-based interventions and simple clinical treatment protocols.

3 - 4 & 17 Nov 2022 | 9am - 5pm | Faculty of Arts and Social Sciences, NUS

ABOUT THE TRAINERS

Ms Ong Jiehan Jamie

Instructor, National University of Singapore

Jamie is a registered psychologist, an approved Clinical Supervisor with the Singapore Register of Psychologists, and a member of the Singapore Psychological Society. She has extensive experience working with children and adolescents with developmental disorders and psychiatric conditions both in a hospital and community setting. Additionally, Jamie is teaching and provides clinical supervision to psychology students at the National University of Singapore.

Ms Carolyn Kee

Consultant Psychologist, Ki Psychology

Carolyn has 25 years of experience treating children and adolescents who have mental health issues. She worked as a psychologist at the Institute of Mental Health's Child Guidance Clinic for 20 years, from 1995 to 2015. Her work includes psychological assessments, individual and group therapy, consultation with partner agencies, training and supervision of psychologists, research, public mental health education and emergency behaviour management. She was also supervisor and co-director of the team that worked with victims of trauma and youth at risk.
